

Water Core Group Agenda
23 January 2007
12:00 at MVC Offices

1. Draft Sengekontacket Pond information summary as a model for the ponds portion of the Plan. What works what doesn't? **15 minutes**
2. Your top 3 issues * see below **30 minutes**
3. Possibility of bringing in a consultant to assist with wastewater management options. **15 minutes**
4. Providing an Island Plan website link to allow public input on what they see as the water quality problems and issues for each pond. **10 minutes**
5. Review committee make up in regard to inviting new members and/or changing members roles or method of participation **15 minutes**
6. Other business

* Would you each identify what you feel are the top three general issues that you feel are common to one of the water resource components (groundwater, fresh surface waters and coastal surface waters)? The issues should be what you feel are causes or potential causes of water resource problems rather than symptoms.

For example: nitrogen loading to coastal waters from septic systems.

The idea is to focus us in on a few priority issues that we can get our teeth into.
